

Introduction To Cloud Computing

LAB 03

Name: Misha Sohail

ID: 2280149

BS-SE 7B

The screenshot shows the 'Create a storage account' page in the Microsoft Azure portal. The top navigation bar includes the Microsoft Azure logo, a search bar, and the user's profile (bsse2280149@szabist.pk). The breadcrumb trail is 'All services > Storage center | Blob Storage >'. The main heading is 'Create a storage account'. Below this, the 'Project details' section is active, with instructions: 'Select the subscription in which to create the new storage account. Choose a new or existing resource group to organize and manage your storage account together with other resources.' The form includes two dropdown menus: 'Subscription' (set to 'Azure for Students') and 'Resource group' (set to 'RG2', with a 'Create new' link below it). Below these are the 'Instance details' section, which includes 'Storage account name' (storageaccount1956m), 'Region' ((Asia Pacific) Central India, with a 'Deploy to an Azure Extended Zone' link), and 'Preferred storage type' (Choose preferred storage type). At the bottom of the form are three buttons: 'Previous', 'Next', and 'Review + create'.

This screenshot shows the 'Create a storage account' page in the Microsoft Azure portal, continuing from the previous one. The 'Instance details' section is still visible. Below it, the 'Performance' section is active, showing two radio button options: 'Standard: Recommended for most scenarios (general-purpose v2 account)' (which is selected) and 'Premium: Recommended for scenarios that require low latency.' Below the 'Performance' section is the 'Redundancy' section, which includes a dropdown menu set to 'Locally-redundant storage (LRS)'. A blue information icon with a text box explains that the selection helps provide relevant guidance and doesn't restrict storage to the resource type, with a 'Learn more' link. The bottom of the page shows the 'Review + create' button.
